

OPTION: DOOR/RAMP

Our Door/Ramp platform - which is standard on our Proscap-Van - is now available as an option for select truck bodies! This larger ramp door option allows for easier ingress/egress and improves efficiency when compared to a standard walkramp or liftgate.

BENEFITS

The Door/Ramp platform has many applications in a wide variety of vocations - Moving & Storage, Party Rental, Toy Haulers, etc. It's quite clear that anyone who wants to be able to get in and out of the rear of their truck easier will benefit.

FEATURES

The Door/Ramp combines the functionality of a rear door with the added benefit of a secondary, articulated section that essentially creates a full body width walkramp.

Designed for Morgan truck bodies that are 102" wide x 103" or 109" inches high, the ramp length is 13' 1" long.

FAQ

Q What body models are applicable to the rear ramp door?

Dry Freight van body models:

- 103" h x 102" w
- 109" h x 102" w (requires 6" lower rear frame header)

Q What is the load capacity of the ramp door?

Rear ramp door max. capacity = 2500lb

Q Is the door easy to operate?

Yes, the primary door is "balanced" by a dual-spring operator.

<https://www.morgancorp.com/dry-freight/furniture-mover>

Q What is the typical angle of the Door/Ramp?

14° - 19° depending on the bed height of the truck

Q Can I get the rear ramp door on a reefer body?

No, the ramp door is not available on reefer bodies.

Q What if I need a smaller truck for my Packing Teams?

The Proscap Van would work great - the body is 96" wide x 85" high.
